<tbody>
<tr>
<td><strong>Length of Course:</strong></td>
<td>1.5 units, 30 hours (2 hours lecture, 1 hour lab/week)</td>
</tr>
<tr>
<td><strong>Course Description:</strong></td>
<td>This elective course consists of the analysis and diagnosis of spinal musculoskeletal disorders utilizing the Sacro Occipital Technique; and will cover the SOT categorization of subluxations and the specific correction required to restore normal function.</td>
</tr>
<tr>
<td><strong>Prerequisite:</strong></td>
<td>TECH-130</td>
</tr>
<tr>
<td><strong>Course Offered By:</strong></td>
<td>Technique Department</td>

**Technique Lab Attire Policy:**

Healthy clean hygiene is expected from all students. It is recommended that students bring a face cloth and/or towel to place on the table. Towels reduce the need for the use of chemical sanitation treatments on the adjusting tables.

**Accessibility to the Spine and Spinal Structures:**

- Patient gown - In an effort to recreate a clinical setting and to appropriately facilitate the realistic use of skills relative to professionalism and personal
boundaries, “gowns” made of torn or altered t-shirts/garments are not acceptable for this course.

- To maintain modesty and a professional environment, no revealing attire is permitted.
- Covered shoes (sandals and flip flops do not qualify) are required for all participants.

**Materials Required:**
Patient Gown (preferably waist length)
Skin Marking Pencil

Please check with your instructor for any further instructions for your particular course or if you have any concerns about the appropriateness of specific articles of clothing.

**Technique Department Elective Policy:**

*NOTE: All electives at LCCW are pass / no pass. Any student who drops or does not pass an elective will not be eligible to take an elective the following quarter. In accordance with technique department regulations Elective classes must be passed with at least 75% successful completion rate of the required assessments.*

**Evaluation / Grading Criteria:**

- Grading of each student involves the following;
  - The ability to analyze whether a patient is a candidate for S.O.T
  - Detect whether the patient is one or more of the three categories specific to S.O.T.
  - The students’ ability to correct the specific finding, category or subluxation that was detected and analyzed.

- A practical assessment is given during the last week to each student by the instructor worth 100 points to determine whether a student passes the criteria above.

- **A passing grade of 75% must be obtained on this practical assessment in order to pass the class.**

**Extra Credit:** None
Grades and the Grading System Final Grades are available online through the CAMS student portal. If there are any questions on grading procedures, computation of grade point average, or the accuracy of the grade report, please contact the Registrar’s Office or the Office of Academic Affairs. Grades will be reported and evaluation will be based on the Academic Policies, Procedures, & Services. Please refer to Evaluation Policy (Policy ID: OAA.0007)

In order to maintain Satisfactory Academic Progress, a student must maintain a 2.0 or better in each and every course. Any grade less than a C must be remedied by repeating the class. Please refer to Satisfactory Academic Progress (Policy ID: OAA.0006)

Attendance: Please refer to Attendance Policy (Policy ID: OAA.0002)

Conduct and Responsibilities: Please refer to the Personal Conduct, Responsibility and Academic Responsibility Policy (Policy ID: OAA.0003)

Make-up Exams: Please refer to Make-up Assessment Policy (Policy ID: OAA.0001)

Request for Special Testing: Please refer to Request for Special Testing (Policy ID: OAA.0004)

Accommodation for Students with Disabilities:
If you have approved accommodations, please make an appointment to meet with your instructor as soon as possible. If you believe you require an accommodation, but do not have an approved accommodation letter, please see the Academic Counselor Lori Pino in the Office of Academic Affairs. Contact info: Lpino@lifewest.edu or 510-780-4500 ext. 2061. Please refer to Service for Students with Disabilities Policy (Policy ID: OAA.0005)

Electronic Course Management:
Canvas is LCCW’s Learning Management System (LMS). Canvas will be used throughout the quarter during this course. Lectures, reminders, and messages will be posted. In addition, documents such as the course syllabus and helpful information about the class project will be posted. Students are expected to check Canvas at least once a week in order to keep updated. The website address for Canvas is https://lifewest.instructure.com/login/canvas Please refer to the Educational Technologies Policy (Policy ID: OAA.0009)

Course Purpose: To give students a basic knowledge of SACRO-OCCIPITAL TECHNIQUE approach in the treatment of sacro-iliac and low back disorders. This course is required for those students planning to take the advanced S.O.T. course.
COURSE OUTLINE:

WEEK 1: Introduction to SOT

**Category II:** Introduction.
- Standing assessment: Body sway
- Cervical and 1st rib indicator.
- Mind language Test.
- Supine assessment:
  - Leg length evaluation
  - Ilio-femoral Test
- Student hands-on practice

**WEEK 2:**

**Category II:** Review previous lecture.
- Subluxation assessment: Trapezius lines
- Student Hands-on practice.

**WEEK 3.**

**Category II:** Review
- Alternate Weight bearing Test

**Category I:** Introduction.
- Mind language Test
- Supine assessment:
  - Rule out Category II
- Prone assessment:
  - Heel tension
  - Atlas/Dural stress Blocking
- Student hands-on practice

**WEEK 4:**

**Category I:** Review.
- Prone assessment:
  - Crest sign
  - Dollar sign
  - SB+ SB- SB neutral
  - Vasomotor adjustment
- Ancillary procedure: Hiatal hernia
- Student hands-on practice

**WEEK 5:**

**Category I:** Review
- Ancillary procedures: Cervical Stair stepping

**WEEK 5:**

**Category I:** Review
- Ancillary procedures: Cervical Stair stepping
- Anterior Atlas
- Anterior ribs / Posterior Superior 1st rib
- Posterior Superior Occiput
Occipital Compaction/Occipital side slip

WEEK 6:  **Category III:** Introduction.

Standing assessment: Body sway Cervical & 1st rib indicators
Supine assessment: Rule out Category II
Prone assessment: SOTO Test Blocking
Student hands-on practice

WEEK 7:  **Category III:** Review.

Prone assessment: Vertebrogenic Pain Syndrome Student hands-on practice

WEEK 8:  Review all Categories: Student demonstrations.
WEEK 9:  Review all Categories: Student demonstrations.

WEEK 10: **FINAL EXAMINATION**

**Student Learning Outcomes (SLO):** At the completion of the Tech-186 course, a student should be able to:

1. Determine the categorization of a patient specific to SOT.
2. Demonstrate how SOT applies uniquely and in conjunction with other techniques and procedures in patient care.
3. Perform the correction of each category detected using the proper procedures.
4. Apply SOT procedures to individual patients.
5. Demonstrate a practical knowledge of the management process of each category and the clinical process involved as changes occur.
6. Apply the SOT protocol throughout the initial and potentially changing patient presentation as care continues.
7. Demonstrate a practical knowledge of the biomechanical influences and changes that occur with the cause and correction specific SOT categories.

The following PLO's are mapped to this course: [2, 7]

**Program Learning Outcomes (PLO):** Students graduating with a Doctor of Chiropractic degree will be proficient in the following:

1. **ASSESSMENT AND DIAGNOSIS:** An assessment and diagnosis requires developed clinical reasoning skills. Clinical reasoning consists of data gathering and interpretation, hypothesis generation and testing, and critical evaluation of diagnostic strategies. It is a dynamic process that occurs before, during, and after the collection of data through history, physical examination, imaging, laboratory
tests and case-related clinical services.

2. **MANAGEMENT PLAN:** Management involves the development, implementation and documentation of a patient care plan for positively impacting a patient’s health and well-being, including specific therapeutic goals and prognoses. It may include case follow-up, referral, and/or collaborative care.

3. **HEALTH PROMOTION AND DISEASE PREVENTION:** Health promotion and disease prevention requires an understanding and application of epidemiological principles regarding the nature and identification of health issues in diverse populations and recognizes the impact of biological, chemical, behavioral, structural, psychosocial and environmental factors on general health.

4. **COMMUNICATION AND RECORD KEEPING:** Effective communication includes oral, written and nonverbal skills with appropriate sensitivity, clarity and control for a wide range of healthcare related activities, to include patient care, professional communication, health education, and record keeping and reporting.

5. **PROFESSIONAL ETHICS AND JURISPRUDENCE:** Professionals comply with the law and exhibit ethical behavior.

6. **INFORMATION AND TECHNOLOGY LITERACY:** Information literacy is a set of abilities, including the use of technology, to locate, evaluate and integrate research and other types of evidence to manage patient care.

7. **CHIROPRACTIC ADJUSTMENT/MANIPULATION:** Doctors of chiropractic employ the adjustment/manipulation to address joint and neurophysiologic dysfunction. The adjustment/manipulation is a precise procedure requiring the discrimination and identification of dysfunction, interpretation and application of clinical knowledge; and, the use of cognitive and psychomotor skills.

8. **INTERPROFESSIONAL EDUCATION:** Students have the knowledge, skills and values necessary to function as part of an inter-professional team to provide patient-centered collaborative care. Inter-professional teamwork may be demonstrated in didactic, clinical or simulated learning environments.

9. **BUSINESS:** Assessing personal skills and attributes, developing leadership skills, leveraging talents and strengths that provide an achievable expectation for graduate success. Adopting a systems-based approach to business operations. Networking with practitioners in associated fields with chiropractic, alternative medicine and allopathic medicine. Experiencing and acquiring the hard business skills required to open and operate an on-going business concern. Participating in practical, real time events that promote business building and quantifiable marketing research outcomes.

10. **PHILOSOPHY:** Demonstrates an ability to incorporate a philosophically based Chiropractic paradigm in approach to patient care. Demonstrates an understanding of both traditional and contemporary Chiropractic philosophic concepts and principles. Demonstrates an understanding of the concepts of philosophy, science, and art in chiropractic principles and their importance to chiropractic practice.
